

1. A digital content billing system using a network,
comprising:

a distributor for obtaining the digital content from the holder and distributing the digital content to a user;

10 an administrator for obtaining the advertising
information piece from the advertiser, receiving an
execution declaration of the digital content from the user,
downloading the advertising information piece and a
permission for the execution declaration to the user
15 through the network, collecting an advertisement rate,
which corresponds to the number of execution times of the
digital content used by the user, from the advertiser and
paying an execution fee, which corresponds to the number
of execution times of the digital content, to the holder.

2. A digital content billing system using a network,
comprising:

a distributor for obtaining the digital content from the holder and distributing the digital content to a user;

30 an administrator for obtaining the execution key from the

holder, obtaining the advertising information piece from the advertiser, receiving an execution declaration of the digital content from the user, downloading the advertising information piece and the execution key to the user through the network, collecting an advertisement rate, which corresponds to the number of execution times of the digital content used by the user, from the advertiser and paying an execution fee, which corresponds to the number of execution times of the digital content, to the holder.

10

3. A digital content billing system using a network according to claim 2, wherein the advertising information piece downloaded to the user is displayed simultaneously with the digital content in cases where the user uses the digital content by using the execution key downloaded to the user.

15

4. A digital content billing system using a network according to claim 2, wherein the advertising information piece downloaded to the user is displayed in a time period between time periods in which the digital content is displayed in cases where the user uses the digital content by using the execution key downloaded to the user.

20

5. A digital content billing system using a network according to claim 2, wherein the distributor notifies the holder of the number of download times of the digital content downloaded to the user, and the holder pays a download charge, which corresponds to the number of download times of the digital content, to the distributor.

30

6. A digital content billing system using a network according to claim 2, wherein the administrator downloads a plurality of advertising information pieces and the
5 execution key, which permits the user to use the digital content prescribed times, to the user in cases where the administrator receives the execution declaration of the digital content from the user.

10 7. A digital content billing system using a network according to claim 2, wherein the user uses the digital content by using an execution key downloaded from the administrator in the past while seeing an advertising information piece downloaded from the administrator in the
15 past in cases where the execution key is not currently downloaded to the user from the administrator because of an abnormal state even though a prescribed time passes after the user sends the execution declaration of the digital content.

20 8. A digital content billing system using a network according to claim 7, wherein the user notifies the administrator that the user uses the digital content by using the execution key downloaded from the administrator
25 in the past after the abnormal state is finished.

9. A digital content billing system using a network according to claim 2, wherein the advertising information piece downloaded from the administrator to the user
30 corresponds to content of the digital content.
